Introduction

Welcome to PowerSchool! PowerSchool helps your school access and maintain student, staff, and schedule information. PowerSchool is a database application that runs on a server, which is the center of your student information system. PowerSchool uses the Internet to facilitate student information management and communication among school administrators, teachers, parents, and students.

PowerSchool Parent Portal is a tool that is integrated into the PowerSchool Student Information System (SIS) that is specifically developed for parents and students.

PowerSchool Parent Portal gives parents and students access to real-time information including attendance, grades and detailed assignment descriptions, school bulletins, lunch menus and even personal messages from the teacher. Everyone stays connected: Students stay on top of assignments, parents are able to participate more fully in their student's progress, and teachers can use their gradebook to make decisions on what information they want to share with parents and students.

Parent Access Management

With the introduction of Parent Access Management, PowerSchool now provides single sign-on access to the PowerSchool Parent Portal. With single sign-on access parents can now have their own individual parent account, including user name and password. Your school's PowerSchool administrator may create your account or may have you create your own account using the appropriate access credentials. Once your account is created, you can manage your account information, link any and all students to your account (for whom you have parental and legal rights to), and set email and notifications preferences for each student linked to your account. If you've forgotten your account sign in information, you can retrieve them by using auto-recovery.

Note: This functionality is only available if enabled by your school.
